

Software Installation (Windows 98 and ME)

1. Insert the SilverLink 4 installation CD in the CDROM drive
2. The USB Driver installation program will start automatically
3. If autorun is not enabled on your computer, go to step 5
4. Do NOT install the USB drivers.
5. Connect the SilverLink 4 box to a free USB port of your computer using the USB cable provided
6. Windows will indicate "New hardware found"
7. Preferably let Windows search for the drivers
8. In case Windows doesn't find the drivers, indicate Windows that the drivers can be found on the CDROM
9. If Windows informs you that the drivers are not compatible, click on "Continue anyway"
10. The USB Serial Converter is now installed
11. Windows will indicate again "New hardware found"
12. Preferably let Windows search for the drivers
13. In case Windows doesn't find the drivers, indicate Windows that the drivers can be found on the CDROM
14. If Windows informs you that the drivers are not compatible, click on "Continue anyway"
15. The USB Serial port is now installed
16. The installation is completed

Quickstart installation instructions**Parts list SilverLink 4**

1. SilverLink 4 box
2. USB Cable
3. Power Supply + power lead
4. CDROM USB drivers
5. This leaflet

Software Installation (not for Windows 98 or ME)

NOTE: INSTALL THE SOFTWARE BEFORE CONNECTING THE SILVERLINK 4 TO THE COMPUTER

1. Insert the SilverLink 4 installation CD in the CDROM drive
2. The USB Driver installation program will start automatically
3. If autorun is not enabled on your computer, look for the CDROM and double click on Setup.exe in the root of the CD
4. Follow the on screen instructions; the InstallShield installation wizard will guide you through the process
5. Before clicking **Finish**, check that the installation of the USB drivers is completed. Move the installation dialog so you can see whether another program is covered by the installation dialog.
